

Serial No. 10/721,179  
Amdt. Dated November 16, 2004  
Reply to Office Action of August 18, 2004

Docket No. K-0586

**Substitute Abstract:**

A dryer with an improved arrangement of heating coils is provided. The improved heater assembly includes a heater case partitioned into an upper passage and a lower passage, with independent first and second coil arrays crossing the plate between the upper and lower passages. The first and second coil arrays may be separately controlled to adjust an amount of drying capacity provided to the dryer while maintaining a uniform flow of drying air.
